VatOil CleanTech EM

Description

CleanTech EM is a mineral emulsifiable degreaser, based on a highly refined solvent. Selected substances have been added in order to achieve a good cleaning effect. CleanTech EM removes oils, greases, dirt and other impurities from components, engines, machines, etc.

CleanTech EM is non-aggressive and does not pose a fire risk as it has a high flash point of 70°C.

Application

Apply CleanTech EM to the surface to be cleaned using a brush or spray. After allowing it to soak in for 3 to 5 minutes, the item to be cleaned can be rinsed with running water or a high pressure hose. For smaller items, CleanTech EM can also be used in an immersion process.

NB: CleanTech EM or rinsing water must not be released directly into municipal sewers or surface water. Ensure that the rinsing water is passed through an oil-water separator.

Typicals

| | |
|-------------------------------------|-------|
| Density at 15 °C, kg/l | 0,798 |
| Viscosity 40 °C, mm ² /s | 1,60 |
| Flash Point PM, °C | 72 |
| Pour Point, °C | -36 |
| pH - 10 % in water | 8,0 |
