ATF Type III NC

Description

ATF Type III NC is a modern automatic transmission oil that complies with the most recent GM Dexron III specification. ATF Type III is a semi-synthetic product with specially selected additives to give the product the following properties:

- Extremely low viscosity at low temperatures
- Extremely high and stable viscosity index
- Excellent resistance to oxidation at high temperatures
- Very high resistance to wear, corrosion and foaming
- Specific friction properties
- Does not affect seals and non-ferrous metals

Application

ATF Type III NC can be used for automatic transmissions, power-steering units, torque converters and other applications, for which a GM Dexron III or any of the following specifications is recommended.
