Kroon-Oil Coolant SP 13

Description

Coolant SP 13 is a premium, ready-to-use, Long Life coolant with frost protection down to -38 °C, which contains the patented LOBRID additive technology based on 'Organic Acid Technology' and a small percentage of silicate. It has been specifically designed for use in engines/radiators made from light metals such as aluminium, magnesium or their alloys and complies with VW specification TL VW 774J (G13).

Thanks to the addition of powerful corrosion inhibitors, the product is practically unaffected by ageing. Corrosion inhibitors also prevent sludge and deposits forming in the radiator, thereby also ensuring optimal cooling in the long term.

Please note! Reliable measurement of the freeze protection level is only possible using special refractometers with a separate G13 scale!

Application

Coolant SP 13 is a purple-coloured, ready-to-use coolant for the cooling systems of Volkswagen, Audi, Skoda and Seat vehicles. Coolant SP 13 can be easily mixed with Kroon-Oil Coolant SP 12++ and Kroon-Oil Coolant SP 12. Optimal results can only be achieved with 100% filling.

Specifications

VW TL 774-J (G13)

Typicals

Density at 15 °C, kg/l	1,088
pH - value	8,3
Crystallizationpoint, °C	-38

Available packagings

34685
1 L bottle

34686
5 L can

34687
20 L can

34688
60 L drum

34689
208 L drum
