Kroon-Oil Industrial Chainspray Light

Description

Industrial Chain Spray is an amber-coloured, synthetic lubricant that has been specially developed for lubricating chains in industrial installations. The product contains a number of supplements, additives and solvents, in order to maintain flexibility under any conditions. Furthermore, Industrial Chain Spray contains special 'Extreme Pressure' additives and wear-reducing molybdenum-disulfide. The product has the following properties:

- Reduced friction between the moving metal parts
- Excellent penetrative ability that even enables it to reach steel wire cable cores
- Effective protection against corrosion
- Excellent adhesion to metals
- Remains flexible, even at low temperatures
- The ability to resist high bearing pressures

Application

Industrial Chain Spray is used for the lubrication of machine components such as bicycle chains and gears not lubricated using an oil bath or mechanical lubrication. It is also ideal for applying to hinges, steel cables and mechanical pivots subjected to light loads.

Instructions for use:

The product is supplied in a spray can with a unique reversing valve so that the spray can work in any position, even upside-down! Remove all remaining grease before using Industrial Chain Spray.

Available packagings

38016

400 ml aerosol
