Kroon-Oil PTO MoS2

Description

PTO MoS2 is a highly penetrating, rust-loosening fluid, which penetrates below the oxide layer of metal components that have seized due to rust. PTO MoS2 contains additives, including the renowned dry lubricant molybdenum disulfide (MoS2) and colloidal graphite, which ensures that the product lubricates effectively and provides extra protection against corrosion and wear.

Application

PTO MoS2 is suitable for freeing all metal parts that have seized as a result of rusting, such as bolts, screws, nuts, hinges, etc.
