Gearlube HS GL-5 80W-140

Description

Gearlube HS GL-5 80W-140 is an extremely modern synthetic transmission oil. By using low-viscosity, synthetic base oils combined with advanced additives, the following properties are achieved:

- Saves fuel (cost benefit)
- Does not affect seals in any way (no risk of leakage)
- A strong lubricant film, even under the toughest conditions (high technical reliability)
- Its low viscosity ensures that gear-changing takes place more easily (ease of use)
- Effectively prevents wear on the gearbox and bearings (extending the service life of drive line)
- Copes exceptionally well with the (longer) oil change intervals that apply nowadays (for added security)

Application

Gearlube HS GL-5 80W-140 is a fuel-saving synthetic transmission oil and has been developed for use in the most heavy-duty hypoid transmissions in rear axles and manual transmissions. It can also be used in all transmissions in which 'Extreme Pressure' oils are recommended.

Specifications

API GL-5

MIL-L-2105D

Typicals

Density at 15 °C, kg/l	0,900
Viscosity 40 °C, mm ² /s	228,00
Viscosity 100 °C, mm ² /s	27,80
Viscosity Index	158
Flash Point COC, °C	220
Pour Point, °C	-33

Available packagings

57014
20 L pail

35243
20 L can

12172
60 L drum

12268
208 L drum
