Kroon-Oil Inox G13 FG

Description

Inox G13 FG removes fingerprints and other contaminants from stainless steel components. The product forms a protective film after cleaning. The use of selected additives gives Inox G13 FG the following special properties:

- Outstanding cleaning properties thanks to special, surface-active substances
- Ensures that the items that have been treated have a well-maintained appearance
- Forms a thin, protective film that effectively acts to prevent the adhesion of new contaminants

Application

Inox G13 FG has been specially developed for cleaning stainless steel. As has frequently been seen in kitchens and factory buildings, stainless steel is susceptible to difficult to remove fingerprints. Grease spots and water stains may also occur. Inox G13 FG removes these stains extremely thoroughly, leaving the surface with a beautifully clean appearance.

Instructions for use:

- Apply the product undiluted
- Wipe off with a cloth
