Kroon-Oil Vloerkorrels

Description

Floor Grit is made from special fossil raw materials that have been formed by algae and shellfish. Through a process of calcination, special, porous, low-dust materials are obtained with a very effective absorption ability. Floor Grit absorbs acids, alkalis, chemicals, fuels, oils, greases, paints, and lacquers quickly and safely.

Application

Floor Grit provides a fast, thorough and safe method of cleaning up liquid spills. The product has the following properties:

- Absorbs all dirty, greasy and aggressive substances
- Cleans and protects floors
- Discolours during fluid uptake
- Reusable
- Non-dusty
- Slip resistant
- Easy to sweep up
- Unlimited shelf life
- Not harmful to health
