### Kroon-Oil Coolant SP 14

#### Description

Coolant SP 14 is a premium, ready-to-use Long Life coolant (frost protection down to -40 °C) for which a patented, silicate-free technology based upon carboxyl acids, has been used. With this technology, Coolant SP 14 provides longer lasting protection against corrosion than standard antifreeze, so that vulnerable parts such as radiators, water pumps and seals will have a longer service life.

Powerful corrosion inhibitors prevent sludge and deposits forming in the radiator, ensuring optimal cooling, even in the long term. Coolant SP 14 is specifically designed for use in engines/radiators made from light metals such as aluminium, magnesium or their alloys.

#### Application

Coolant SP 14 is a green/blue, ready-to-use coolant for use in the cooling systems of Peugeot and Citroën vehicles. By using powerful corrosion inhibitors, Coolant SP 14 is practically unaffected by ageing, giving it a much longer service life than conventional coolants. Optimal results can only be achieved with 100% filling.

#### Specifications

Peugeot PSA B 71 5110

Citroen PSA B 71 5110

#### Typicals

Density at 15 °C, kg/l 1,082

pH - value 8,2

#### Available packagings

31218  
1 L bottle

31219  
5 L can

31242  
20 L can

31243  
60 L drum

31244  
208 L drum
