Abacot MEP HD 68

Description

Abacot MEP HD 68 is a synthetic transmission oil based on synthetic hydrocarbons. It is supplemented with special additives to achieve the following properties:

- Naturally high viscosity index
- Excellent high- and low-temperature properties
- Excellent resistance to high pressures and shock loads
- Effective protection against micro pitting
- Very high resistance to corrosion and oxidation
- Long service life
- Substantial reduction in friction losses

Application

Abacot MEP HD 68 is particularly suitable for the lubrication of heavy-duty mechanical transmissions and bearing systems with a high thermal load. Compared with mineral transmission oil, the oil change interval can be significantly extended. This oil can easily be mixed with mineral transmission oil, meaning that switching from mineral transmission oil to Abacot MEP HD 68 does not require a specialised procedure.

Specifications

AGMA 9005-F16 (AS)

AIST (US Steel) 224

David Brown S1.53.106

DIN 51517-3 CLP

ISO 12925-1 Type CKD

Typicals

Density at 15 °C, kg/l	0,849
Viscosity 40 °C, mm ² /s	68,00
Viscosity 100 °C, mm ² /s	10,70
Viscosity Index	146
Flash Point PM, °C	195
Pour Point, °C	-42
Acid number, mgKOH/g	1,10
Calcium, mg/kg	0
Phosphorus, mg/kg	450

Available packagings

31275

208 L drum
