Kroon-Oil Coolant SP 16

Description

Coolant SP 16 is a superior, ready-to-use Long Life coolant (frost protection down to -38°C) made using a patented, silicate-free technology based upon polycarboxylic acids. With this technology, Coolant SP 16 provides much longer-lasting protection against corrosion than standard antifreeze, ensuring a longer service life of vulnerable parts such as radiators, water pumps and the thermostat.

Powerful corrosion inhibitors prevent sludge and deposits forming in the radiator, ensuring optimal cooling, even in the long term. Coolant SP 16 provides maximum protection for all metal and plastic engine parts and prevents cavitation.

Application

Coolant SP 16 is a fluorescent yellow, ready-to-use, Long Life coolant for use in coolant systems of passenger cars, delivery vans and freight trucks of the Renault, Nissan and Dacia brands. By using powerful corrosion inhibitors, Coolant SP 16 is practically unaffected by ageing, giving it a much longer service life than conventional coolants. Optimal results can only be achieved with a 100% filling.

Specifications

Renault SA: Renault, Nissan (41-01-001/-S Type D)

Typicals

Density at 15 °C, kg/l 1,047

Available packagings

32693
1 L bottle

32694
5 L can

32695
20 L can

32696
60 L drum

32697
208 L drum
