### AdBlue

#### Description

AdBlue is a high quality urea solution, especially developed for all vehicles with the automotive SCR catalytic converter to meet the Euro IV, Euro V or Euro VI emission demands. By injecting AdBlue into the SCR catalytic converter, all harmful nitrogen oxides (NOx) are immediately reduced into harmless nitrogen and water.

#### Application

AdBlue has been especially developed for all vehicles equipped with SCR catalytic converter. Without AdBlue these vehicles do not comply with the emission demands for Euro IV, Euro V or Euro VI truck engines. AdBlue is produced according to the DIN 70 070 standard.

#### Specifications

ISO 22241

DIN 70070

#### Typicals

Density at 15 °C, kg/l 1,088

Refraction Index 20°C 1,383

#### Available packagings

33428  
10 L can

36230  
200 L drum

36519  
1000 L IBC

The data mentioned in this product information sheet is meant to enable the reader to orientate himself about the properties and possible applications of our products. Although this overview is composed with all possible care on the stated date, the compiler does not accept any liability for damages caused by incompleteness and/or inaccuracies in this information, especially when these are caused by obvious typing errors. The terms of delivery of the supplier apply to all product supplies. The reader is advised, especially for critical applications, to make the final product choice in consultation with the supplier. Due to continual product research and development, the information contained herein is subject to changes without notification.
