Kroon-Oil Coolant SP 12 EVO

Description

Coolant SP 12 EVO is a ready-to-use premium Long Life coolant with a frost protection down to -37 °C. The patented LOBRID PSi-OAT additive technology guarantees excellent and long-term corrosion protection and long-term stability. This product has a very high acid-neutralising capacity, allowing very long change intervals. Unique additives also neutralise the negative effects of flux residue that arises in the production process of aluminium radiators. Furthermore, this product very quickly provides complete corrosion protection; full corrosion protection is already achieved within one operating hour. Coolant SP 12 EVO is completely free of amines, nitrites, borates and 2-ethylhexanoic acid.

Application

Coolant SP 12 EVO is a modern ready-to-use, fluorescent pink, Long Life coolant. The product has been specifically developed for the current generation of VAG models where VW prescribes a G12 EVO quality. Coolant SP 12 EVO is fully backwards compatible and also fully miscible with older VAG coolants (Coolant SP 13, Coolant SP 12++, Coolant SP 12). This product is also suitable for other vehicles for which one of the quality levels listed below is prescribed.

Specifications

ASTM D3306

JIS K 2234

CNH JIC-501

Cummins 85T8-2

Deutz DQC CA-14
