Putoline RS3 Quickdry

Description

RS3 Quickdry offers exceptional efficiency thanks to an abundant foam layer for thorough cleaning. It reduces washing time through automatic drying during rinsing, which saves water and eliminates the need for a separate self-drying product. It leaves a beautiful shine, preventing mineral build-up and re-fouling for several days. Safe for sensitive surfaces.

Application

RS3 Quickdry is a versatile cleaning and drying product with antifouling properties (3-in-1) suitable for light vehicles, trucks, motorbikes, scooters, commercial vehicles, buses and boats. It can be applied at a concentration of 6% with various types of application systems, including manual (bucket and sponge), high-pressure cleaning with spray or with a car wash system. Moreover, this product is safe for materials that are susceptible to ageing.
