Putoline ProBike Quick Fit

Description

ProBike Quick Fit is a biodegradable and high-grade assembly paste that helps to (de)assemble carbon and aluminium parts. Thanks to its special granular structure, it prevents sinking and movement, resulting in smooth (dis)assembly. ProBike Quick Fit offers durable protection against corrosion and wear, protecting your bike components for longer.

Application

ProBike Quick Fit is suitable for the (dis)assembly of saddle and handlebar stems, handlebars, bar ends, bottom bracket cups, pedals, cranks, threaded connections, and more. Start by degreasing the surfaces to be treated, then apply ProBike Quick Fit, and proceed with assembly.
