## Maestrol 2T Advanced

## 说明

Maestrol 2T Advance is a 2-stroke (petrol) motor oil that is semi-synthetic. It is supplemented with special additives to achieve the following properties:

- Outstanding lubrication of all engine parts thanks to effective adhesion: wear is reduced and the service life of the engine is extended
- Powerful detergency, as a result of which the combustion chamber and the exhaust ports remain clear of deposits, even at high temperatures
- Almost complete combustion so that the spark plugs remain clean, ensuring optimal performance of the engine
- Excellent resistance to corrosion and wear
- Limited formation of smoke and odour
- Can be mixed with unleaded petrol

## 应用

Maestrol 2T Advance semi-synthetic motor oil is suitable for high speed and heavy-duty, air-cooled 2-stroke engines in mopeds, motorcycles, scooters, chainsaws, lawnmowers, generators, etc. It is also suitable for 2-stroke engines with water cooling. Can be used as a self-mixing product, or in automatic lubrication systems. Mixing ratio: 1 part oil to 50 parts fuel or use the mixing ratio recommended by the manufacturer.
